

UQL v3

The Smartest TypeScript ORM
Just Got Smarter

Manual Migrations (CLI)

```
> uql db:migrate create  
-n "add..points"  
> uql db:migrate up
```

TypeScript @Entity Class

```
@Entity('user')  
export class User {  
  @Primary()  
  id: string;  
  @Column({ type: 'varchar', length: 255 })  
  username: string;  
  @Column({ type: 'int' })  
  points: number;  
}
```

Entity Auto-Sync (Dev)

Real-time
Schema Update

No Migrations
Needed

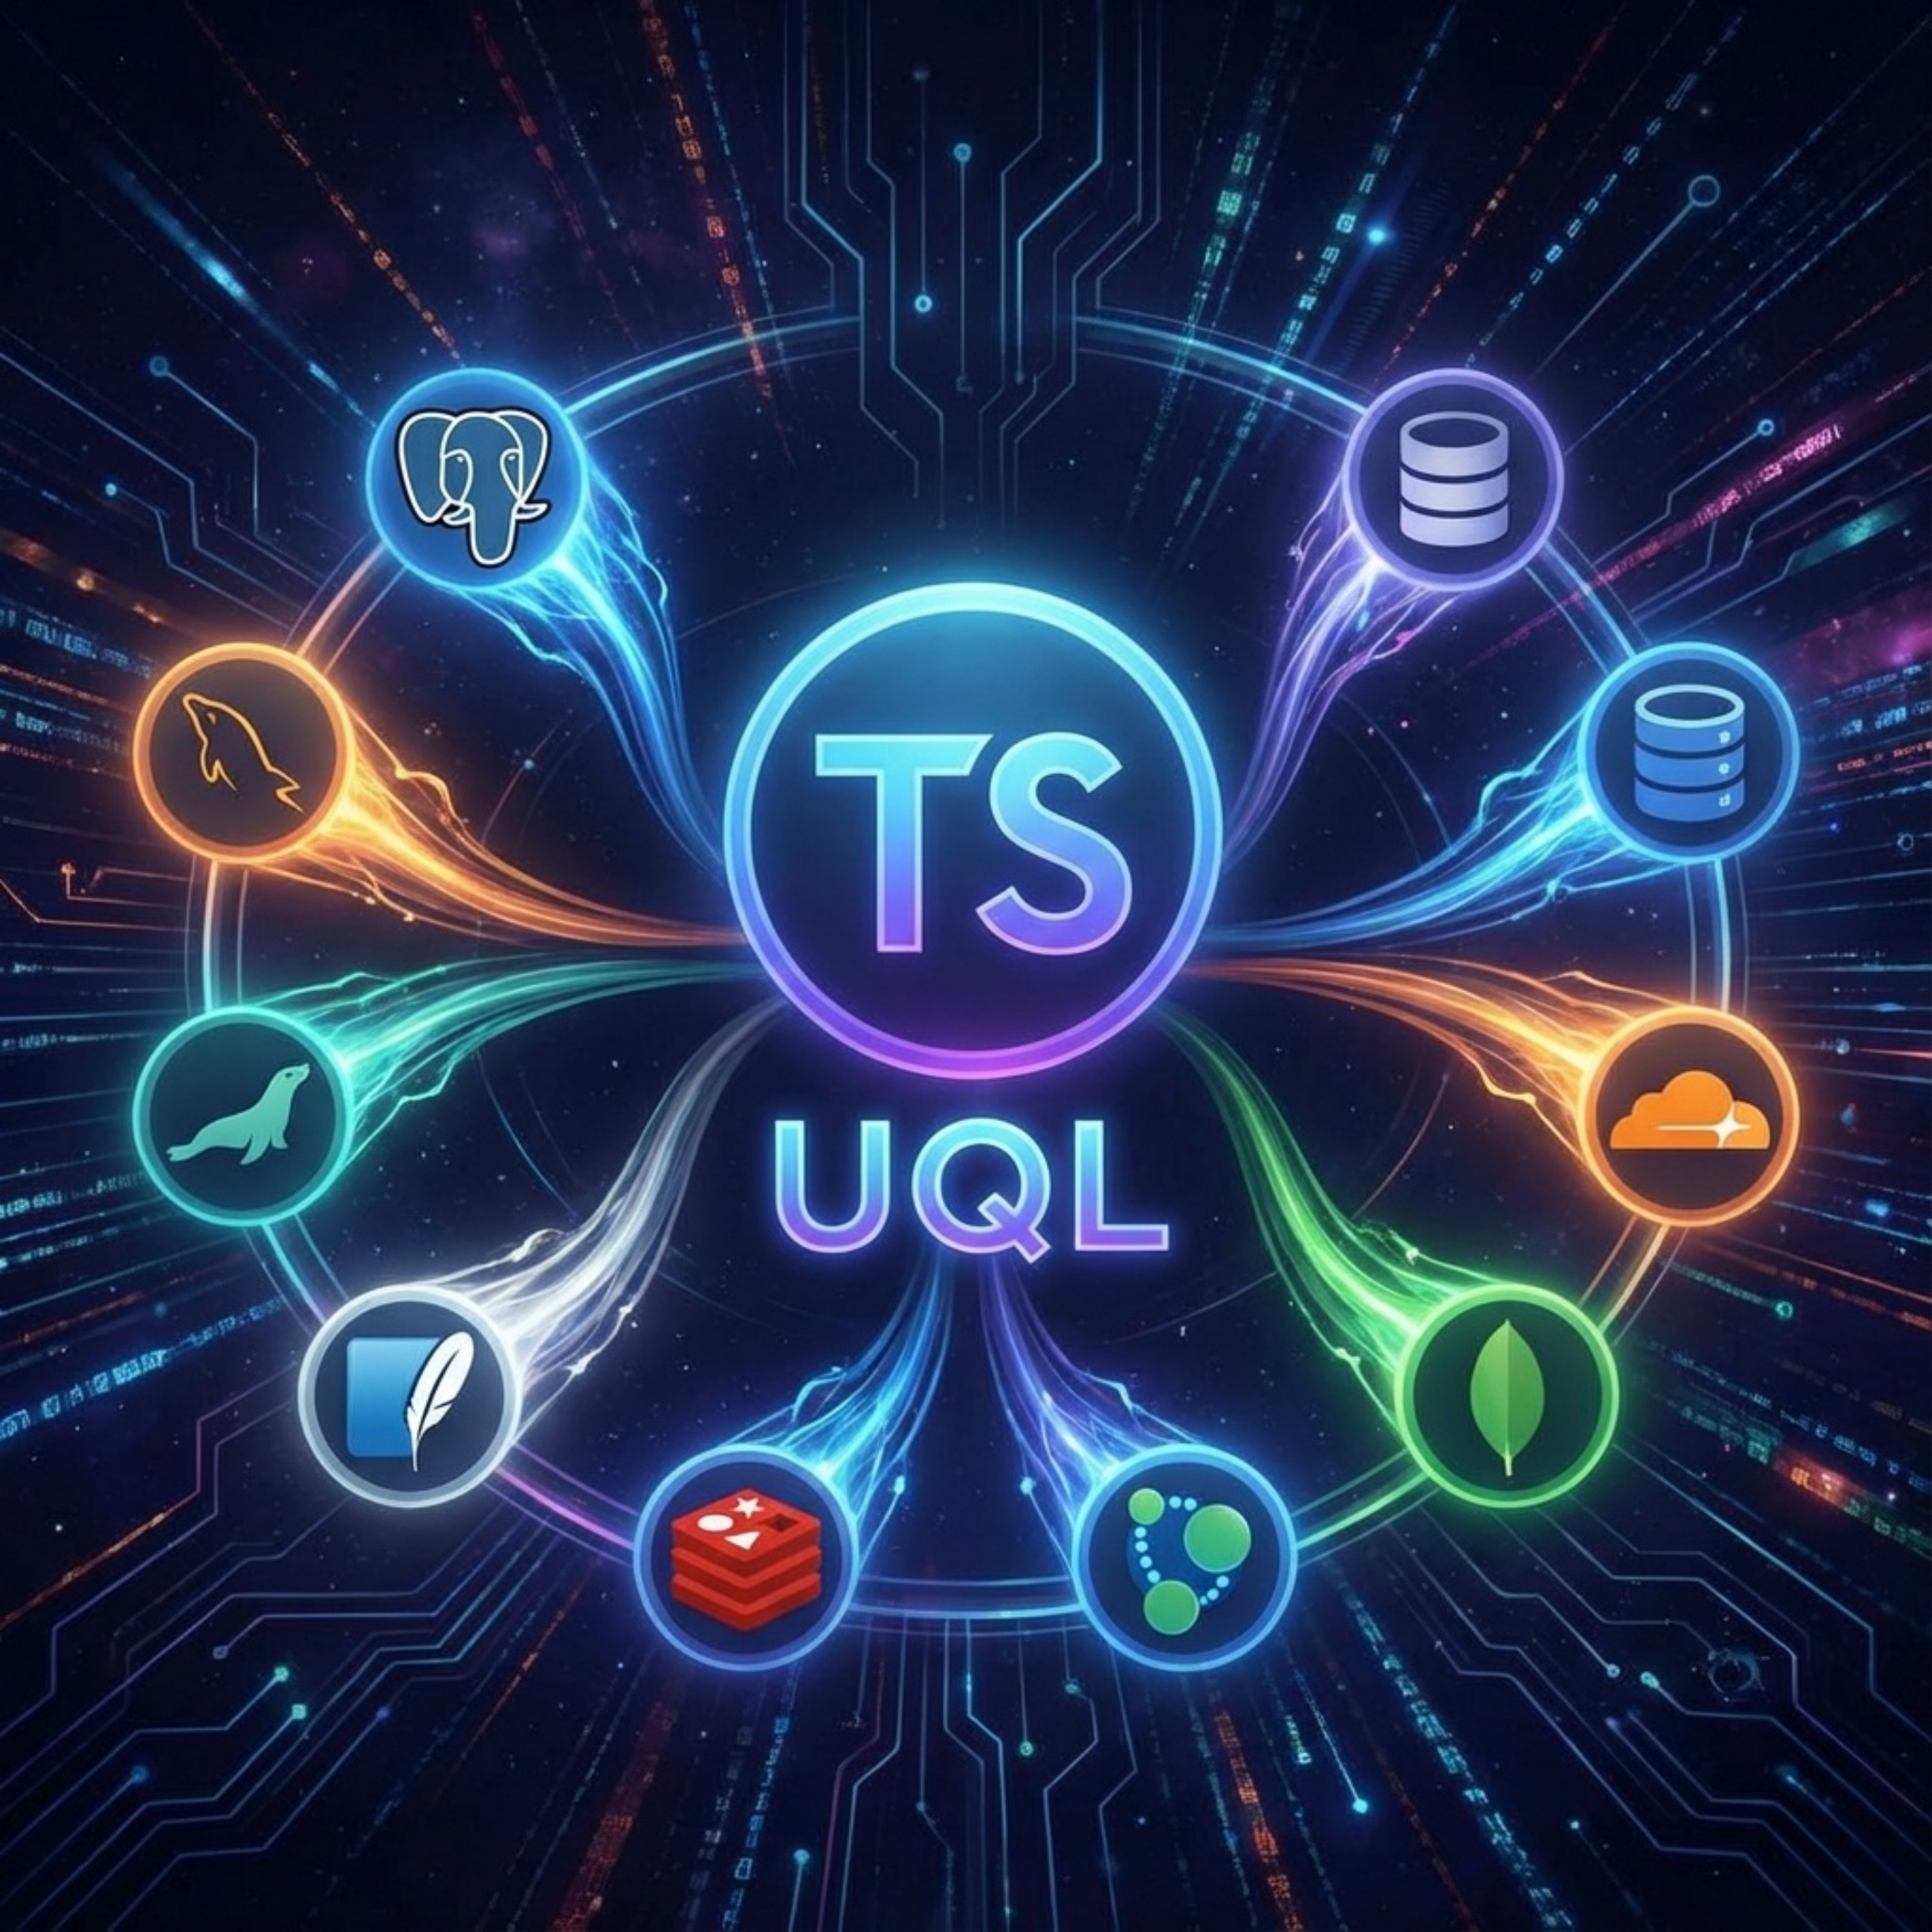

Dev Mode Active

Modern Database

TypeScript to SQL Database Naming Translation

TRY UQL TODAY ✨

```
npm install @uql/core
```
